#### Warning and Precaution

The Combustible GAS detector is a leak locating tool and is not intended for use as a confined-space, personal safety tool. It will not specifically identify a gas or a CFC, and it does not tell you the precise level of a combustible gas or CFC that may be present.

High concentrations of combustible gas/CFC can cause explosions, fires, asphyxia, and other hazards that could cause serious personal injury or death. Be informed on the characteristics and hazards of the gas/CFC you are working with, and use proper precautions to avoid hazardous atmospheres.
